

2022 Global Hydrogen Industrial Association Alliance

2022 GHIAA Forum Global Hydrogen Industrial Association Alliance

2022.05.25 - 2022.05.26

Invitation

International private cooperation is essential for the transition to a hydrogen economy overcoming global climate change and achieving carbon neutrality. To this end, hydrogen industrial associations from 17 countries have decided to strengthen international cooperation by launching the Global Hydrogen Industrial Association Alliance(GHIAA). Accordingly, on May 25th, the official inauguration ceremony of GHIAA will be held in Seoul.

In addition, this event will include an international forum announcing each country's hydrogen policies, an open innovation session that provides information on the hydrogen industry in Korea and opportunities for cooperation with major companies, and a VIP tour in Daegu and Ulsan. We would like to ask for your participation and support from those involved in the hydrogen industry throughout the continents.
